

1- Mnemosyne Protocol = THE BRIDGE  
Between Creative Chaos

and Algorithmic Order  
"IP Registration DOI n  
CERN → Whitepaper ⇒ 10.5281/zenodo

Problem: "Amnesia" GenAI → Output is cheap  
Continuity is expensive!

Solution: OSS - Operating System of STORY TELLING

We don't build models. We build the "Inverse  
orchestration layer that  
sits beneath the models.

Context  
Flow "

Project Alpha: Zero human-in-the-loop. "Automated  
multi-agent" orchestrator catches continuity failures.

ROI: The Cost of Continuity - We sell rails,  
not trams!

• M integrates directly into existing pipelines  
as a background security and continuity connector.

Business Model (Data Driven Licensing)

Value Based Enterprise Licensing → not "per sec"

We charge a fraction of the rework-hours saved

35 years of enterprise system architecture (from 1990  
to 2026) Pascal GRENAT

We don't vibe-code. We build fault-tolerant engineering

The future of Media is Algorithmic!  
Protocols
